

FCS Test Consulting Services help you optimize quality assurance initiatives. FCS assess existing QA processes and identify gaps by benchmarking against industry standards and then work with you to bridge these gaps by identifying and prioritizing improvement measures

Our Approach

FCS identifies and adopts best practice processes and technologies to improve application testing. FCS understands the difficulties involved with mapping vision and objectives for testing functions, identifying gaps, and providing short and long term recommendations. FCS believes in the value of developing strategies and road maps while knowing the complications involved.

Our experienced test experts first understand and evaluate existing processes and systems. This is usually undertaken as a two-or three-week workshop aimed at test management and process improvement.

Our highly qualified test engineers have rich experience and sound understanding of the best practices required for high quality product testing. They complement the development team with honest, unbiased critiques of the development process. All this is done over the short duration of the study, without compromise on quality of deliverables.

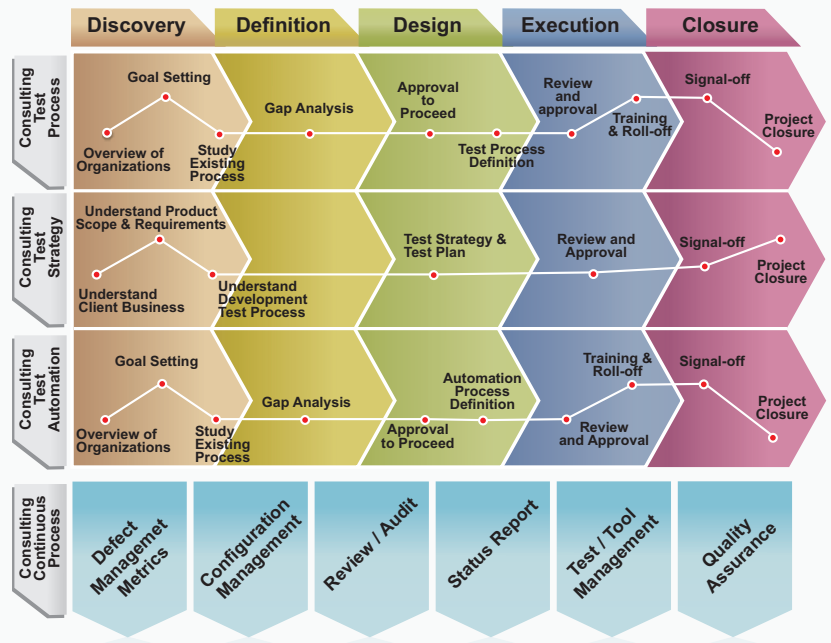

Features

As part of test process consulting, FCS offers assistance with:

- Defining test strategy and test plan
- Gap analysis to help with creating test processes, templates, guidelines and best practices
- Recommendations on areas of improvement
- Roadmap for easy implementation

Key Benefits

- 'Balanced test coverage' approach allows reduction in test documentation
- Test data matrix approach enables effective test coverage
- Critical defects discovered early in the lifecycle
- Faster test execution with desired coverage levels
- Significant reduction of defects in the UAT phase
- Functional knowledge gained during analysis phase can help with design and execution of better test cases
- Easier phased off shoring of maintenance projects

Test Process Consulting

FCS - Delivering value that you can leverage

About FCS

Frontline Consulting Services Inc. (FCS), with world headquarters located in Charlotte, North Carolina, is a systems integration and product development company helping businesses globally to utilize technology and improve their core business process.
